

A stylized illustration of a brain, split vertically. The left half is orange and filled with a circuit board pattern. The right half is green and filled with white binary code (0s and 1s). The brain is centered within a large, light gray hexagon. Surrounding the brain are several dark gray lines of varying lengths, resembling a clock face or a stylized aura. Below the brain, the letters 'SIH' are written in a bold, dark gray font, with a horizontal bar above and below them. The background consists of several light gray hexagons of different sizes. In the top left corner, the word 'PAGE' is written in a large, bold, black serif font. In the top right corner, a small portion of the word 'SIH' is visible.

- **Problem Statement Title-**
- **Theme- Blockchain/Cybersecurity**
- **PS Category- Software**
- **Team ID-**
- **Team Name- Cyber Titans**

Criminal networks span fragmented, unstructured data across FIRs, CDRs, financial records and OSINT - manual analysis is slow and often misses hidden connections and key influencers.

Temporal knowledge graph
Extracts entities & relations, resolves aliases, and timestamps every link with its evidence source

Contradiction detection
Preserves conflicting claims across sources, flags them for investigator review

Hidden-link discovery
Surfaces plausible missing connections from paths, shared neighbors & timing as reviewable leads

Network evolution
Compares 7/30/90-day windows to reveal new actors, links and spikes

Explainable priority engine
Ranks leads on network influence, recency, anomaly & evidence — never a guilt score

Grounded investigation copilot
Read-only natural-language querying, answers cite the underlying evidence

Why we stand out?

Evidence Provenance
Every edge traces to source, timestamp, confidence & reliability — fully auditable.

Fact ≠ Inference ≠ Recommendation
UI never blurs observed data with ML-generated inference or guidance.

Grounded Copilot
Tool-constrained, retrieval-grounded; cites evidence or refuses to answer.

CPU-first, Open-Source
Next.js/FastAPI/Ne o4j stack — no GPU dependency, Docker-reproducible.

INVESTIGATIONS
PENDING

Proposed prototype:

- Command Center – case overview, alerts & priority leads
- Network Explorer – graph, communities, path finder
- Timeline – time-slider, before/after comparison
- Entity Profile – 360° identifiers, evidence, conflicts
- Copilot – natural-language, evidence-cited answers
- Reports & Audit – fact / inference / recommendation

- Technologies to be used (e.g. programming languages, frameworks, hardware)
- Methodology and process for implementation (Flow Charts/Images/ working prototype)

FEASIBILITY AND VIABILITY

- Analysis of the feasibility of the idea
- Potential challenges and risks
- Strategies for overcoming these challenges

IMPACT AND BENEFITS

- Potential impact on the target audience
- Benefits of the solution (social, economic, environmental, etc.)

RESEARCH AND REFERENCES

- Details / Links of the reference and research work

IMPORTANT INSTRUCTIONS

Please ensure below pointers are met while submitting the Idea PPT:

1. Kindly keep the maximum slides limit up to six **(6)**. (Including the title slide)
2. Try to avoid paragraphs and post your idea in points /diagrams / Infographics /pictures
3. Keep your explanation precise and easy to understand
4. Idea should be unique and novel.
5. You can only use provided template for making the PPT without changing the idea details pointers (mentioned in previous slides).
6. You need to save the file in PDF and upload the same on portal. No PPT, Word Doc or any other format will be supported.

Note - You can delete this slide (Important Pointers) when you upload the details of your idea on SIH portal.
